ADOPT A PARK PROGRAM

The Adopt a Park Program aims at preserving and maintaining Green Spaces. One of the most important ways to keep our parks attractive and safe is through constant maintenance. By investing a little energy, your organization/business can play a big role in this effort. All you need to do is organize a work team from your pool of employees, members or volunteers. The Recreation and Parks (RAP) Department can help you select the project that best suits your group's size and availability. Activities range from one-time projects to ongoing projects. The City RAP Staff can help you coordinate a clean up event. Please contact our office for more information.

We encourage all who would like to volunteer to contact us at:
