Project #1 - Olivia Terrace/Edmore Place Trailhead

Council District: 2 – Paul Krekorian

Project Address: 10031 Olivia Terrace, Sun Valley, CA 91352

Jurisdiction: Public Right of Way and Department of Recreation and Parks

Construction Cost Estimate: \$100,000

Approximate Area: 2,000 sf

Scope of Work: The proposed scope of work is centered on improvements to the trailhead which include resurfacing the trailhead with natural soil or similar material, installing directional signs/maps at the entrance and at the intersection of the Chandler Fire Road Trail and Mt. Latuna Trail, removing weeds, and replacing the trail gate.

Project #2 - Marvin Braude Mulholland Gateway Park Trailhead

Council District: 3 – Bob Blumenfield

Project Address: 3600 Reseda Blvd., Tarzana, CA 91356

Jurisdiction: Public Right of Way and Mountains Recreation & Conservation Authority

Construction Cost Estimate: \$256,000

Approximate Area: 5,000 sf

Scope of Work: The scope of work is focused on improvements to the trailhead which includes resurfacing the ground with stabilized decomposed granite or similar material, installing new native planting, and constructing a new trail gate. The scope also includes the installation of interpretive signage, one horse mounting block, and one equine water station, near the trailhead.

Project #3 - Griffith Park Equine Crossings and Tunnel

Council District: 4 – Nithya Raman

Project Address: 4730 Crystal Springs Dr, Los Angeles, CA 90027

Jurisdiction: Department of Recreation and Parks

Construction Cost Estimate: \$363,000

Approximate Area: 5,000 sf

Scope of Work: The scope of work entails the installation of six equine crossings throughout Griffith Park. The crosswalks are proposed at the intersection of Condor Trail and Griffith Park Dr, at the intersection of Griffith Park Dr and Skyline Trail, and at the intersection of Rattlesnake Trail and Griffith Park Dr. Crossings with raised crosswalks are proposed at the intersection of Crystal Springs Dr and Cadman Trail, at the intersection of Crystal Springs Dr and Fire Rd, and at a location 100' south of the intersection of Fire Rd and Crystal Spring Dr. Culverts are to be installed along with the raised sidewalks to allow proper drainage. The scope also includes renovating the ramp at the eastern edge of Tunnel One and installing two equine crossing signals, at each end of tunnel.
