JOB DESCRIPTION

The City of Los Angeles is seeking highly talented individuals to serve as Building Operating Engineer in the Department of Recreation and Parks at Cabrillo Marine Aquarium. Cabrillo Marine Aquarium is an aquarium in San Pedro, CA that focuses on the marine life of Southern California.

This position will require the performance of facility operations, equipment monitoring, and maintenance of large tonnage capacity chillers, HVAC systems, and other facility equipment. This position will also operate and maintain various types of refrigeration systems and operate other Aquarium systems. Light electrical, plumbing, and carpentry may be required to maintain the building systems.

This position is a regular Monday – Friday position and may require you to respond to emergencies at night, weekends, and holidays.

REQUIRED

A valid California driver's license, a Steam Engineer's license issued by the Department of Building and Safety of the City of Los Angeles, and a universal Environmental Protection Agency certificate are required.

HOW TO APPLY

Interested candidates should submit their resumes to: Connie Duran connie.duran@lacity.org

TRANSFER

This position is only available for City employees currently in the classification of Building Operating Engineer (5923-0). Building Operating Engineer Assistant and candidates in the Building Operating Engineer Apprenticeship Program do not qualify at this time.
